

VILLAGE EXCHANGE PROGRAM COMMUNITY CO-CREATION UNITS

- Dr. Kurian, Principal, Alvas Degree College

Lockdown is for Crowded Places! We should look down into our villages!

This is time for Villages to come up for feeding cities and to create opportunities for people to work @ Villages. Form Community Re-creating Units (CRU) led by President of the Panchayat, One Media Partner, PDO, One Visionary, Heads of all SHG, Farmers Union Head, Co-operative Society Head and Youth representatives at every village. CRU can take up the task of coordination within the village and to get connected with other Villages for exchange of goods & services on mutual benefit model. Clusters of Villages on mutual support can help each village to focus on Core Competence.

*Dream Tomorrow and Work Today! Lockdown is only an urban issue!! Villages are mostly safe!
Create opportunities to work in villages so that we can feed the cities tomorrow!!*

Make Development Village Centric!

Attract funds from people of our own Village across the world. Give excellent returns on their investment from profit derived from the hard work and sincerity of the people. Let everyone know Village Values are better and powerful than market strategies and manipulations. Every other investment is proved to be of low return and of high risk including bank deposits. This is the best time to embrace villages back and fulfill Gram Swaraj - The dream of Mahatma Gandhi.

GLOBAL TV

Join Us!

Attract people from cities to villages and take it promote ideas for more people to come back and enjoy Village Life.

VILLAGE HOMES

Villages are places where realization is inbuilt in daily life of the people. We can see it in every point in the village life. Villages will embrace us with all its warmth and good heart.

Probably this is the best time to for more people to get into village life. It is very much easier to make reverse migration to happen when we know the value of pure air and drinking water. Space to move around is a great blessing in the villages. This learning is growing faster and it is better when we go into villages together collectively.

Village Homes are an idea in line with these thoughts. Land is available at a lesser price. Cost of construction is very less when we avoid the culture of vertical heights. People can either on permanent basis or on regular basis can go to the Villages. We can take up home constructions on a rotation basis and in a collective way. Village that are happy to welcome people and initiate reverse migration can have youth clubs formed for this purpose. This will create employment at village level. Let us innovate in the way we are guided by the universal power that govern all of us!
