

C++ CHALLENGE

- Lal Goel / CA Valerian Dalmaida / N.V. Paulose

CHARACTER + COMPETENCE + COMMITMENT

*Life after the break and before the break has no common points. New outlook has emerged almost everywhere although some of the small little human beings still may feel as if they are playing a vital role in making of universe. For all others the infinite power has to play the big role. Character, Competence and Commitment are **individual components** that can keep one connected with the universe. One side of C++ Challenge is based on these three vital components.*

COLLEGES + CORPORATES + COMMUNITY

*Three **social components** that can keep humanity in its progress track are Colleges, Corporates and Community. In other words; Number of people, Potential for activities and Platform for things to happen! These three when put together can help each of them gain a little bit better. Other side of C++ Challenge is based on these social components. We should put both the sides to connect and collaborate. We can get a revolutionary transformation in the whole world with integration of integrity into the whole process. Integrity is the key!*

Mr. Lal Goel

CA Valerian Dalmaida

Mr. N. V. Paulose

CHARACTER + COMPETENCE + COMMITMENT

Moving from Force to Source!

All of us should do an introspection at personal level about the quality and size of our performance in the world. Are we doing justice to responsibilities that are entrusted to us? Are we able to perform to our potential or somewhere near to that? It is not very difficult to measure our performance at various parameters. We are forced to perform to certain level far below our potential. Let us go ahead!

Moving from force to source will make large transformations in our performance. Passion and compassion are outcomes of being well connected to the source. We can gain it with Character, Competence and Commitment (C++). Challenge here is to get connected with ourselves, to our fellow beings and to the nature. Mentors here are visionaries who are happy to guide the youth to discover themselves. Call +91 98441 82044 to join.

Mobile is the King! You can click here to Join!

*We have underestimated power of the mobile phone. We can do a lot of great things with right kind use of mobile communication. Most important is its power to inspire and invoke human imagination utilizing video connectivity. Now, we have learned to avoid unwanted rush as well. When we are well connected, focused and activated, we can use mobile phones to do our jobs in an easier and better way. Make use of the king in your hand to create a world around you. Mentors & Institutions may **inspire** students to join!*

Those who join C++ Challenge are given with the best of the training free of cost along with lot of opportunities to achieve greater heights in life. Collective action, Collaborative approach, Global Connect and Cooperative movement are the fine elements in C++ Challenge.

*First task is to introduce two mentors around you and four members from across the world. Connect everyone with this movement. Share this with all your friends and **bring great minds to join!!***

COLLEGES + CORPORATES + COMMUNITY

Do something worth & useful

“India lives in her villages”; said Mahatma Gandhi who spoke about Gram Swaraj. Dr. APJ Abdul Kalam told to connect Villages all around.

We all keep doing things all the times. Make sure all we do further are useful and worth. There we begin. Team up for group initiatives. Share your ideas with others. Have an ear or two also to listen others and to welcome ideas!

Never send anyone unheard. Never let anyone down with your careless casual comments. Create your team. Twelve is the optimum. Make sure the team is to complement with each other. Media is your key activity. You need to know all your strengths now or later! Make a list of resourceful persons and all other resources around you. Start to talk and to team up. Tell people about C++ Challenge and invite everyone to join. Its lot of fun with amazing outcomes!

Talent Pool is Everywhere! We need leaders!!

Identification of leaders and activation of talent pool is the responsibility of colleges, corporates & community. You may need to have a core team that can do everything for a reason and purpose. Connecting individual and community goals with goals of your institution is a vital task. Many may not listen to your long term vision. Keep things in short term projects. Keep them connected around your institution and allow things to evolve with everyone's involvement around.

Colleges, Corporates & Community that come forward and associate with us in C++ Challenge are primarily benefitted from the large pool of mentors who are associated with us for a long time. Great things happen when we are connected to one another. Give one and take ten can be a slogan to remember in this regard. Let us do something different. Winners do things differently. Together we can make the impossible possible!
